3.Research and development, manufacturing, and sales of disinfectants, air fresheners,

deodorants, etc.

Capital: 20 million yen

Bank: Rakuten Bank

## Founding Philosophy:

Treatment and Diet are of the Same Source, Medicine and Food are of the Same Source.

"Treatment and Diet are of the Same Source" and "Medicine and Food are of the Same Source" are two theories which originated from Japan and China respectively. Strictly speaking, these two words have different meanings, but both have the idea that "food creates a healthy body." In order to support modern people who are busy every day and are living with great stress, we would like to spread the technology and products that will trigger a review of our daily diet and life to the world.

## Management Philosophy:

Immutable High Quality and Fluid Demand

In an era in which the world is constantly changing and evolving, we do not forget our awe for "life" and strive to remember "fluidity and immutability" and "coexistence and co-prosperity". In addition to being sensitive to the needs of our customers, we are always conscious of "what is useful for people and the earth", and we are working to create products that are friendly to the environment, society, and the body.

**Social Mission:**

Protect people's life and health through technology.

The world of technology is constantly evolving, and new technologies, services, and products are being created one after another. We believe that if we combine cutting-edge technology with the natural healing power of human beings, the potential of human beings will greatly increase. We are working hard every day to improve our technology to achieve higher customer satisfaction.

**R & D Alliance**

Basidiomycetes-X Study Group in Japan

This is a research organization that aims to develop and improve research on the new mushroom "Basidiomycetes-X", and to exchange information and deepen friendship between researchers. The members are composed of individuals and groups that conduct research on "Basidiomycetes-X", and hold research meetings and seminars every year and carry out necessary related projects.

We support the study group and carry out joint activities such as information exchange and research cooperation.

Left) Basidiomycetes-X Study Group chairman: Tetsuya Konishi

Right) Senior Researcher: Kou
